<Projects>

Portfolio   April, 2023
Link to deployed site | Link to repository

- Personal portfolio using React, Material-UI/Tailwinds, TailwindsCSS, Bootstrap, custom CSS, Framer-Motion, EmailJS, GH-Pages, and more.
- Users can read a bit about me, view a list of projects, their live URLs and repositories.
- EmailJS forwards to my Gmail and my resume can be downloaded from the resume page.

Fluffy – Pet Store E-Commerce   March, 2023
Link to deployed site | Link to repository

- Worked on a team of 5 to build a full stack RESTful API application over a one week time period using Handlebars, JavaScript, Node.js, Express.js, MYSQL, Sequelize, Heroku, Semantic UI and more.
- Worked on creating the visual components with use of Semantic UI and custom css to be desktop and mobile responsive.
- Users can create accounts, store pet info, and shop based on animal type.
- Future development would consist of more curated items based on pets.

CRWN Clothing   May, 2023
Link to deployed site | Link to repository

- Individual project through a Udemy course to practice more elements of React, JavaScript, Styled Components & custom css for styling and mobile responsiveness, Stripe, Redux, Firebase, Google Sign In, Netlify, and more.
- Users can sign in, add items to cart and modify, and checkout via Stripe using serverless functioinality.

<Work Experience>

TECHNICAL TEAM LEAD – SUPPORT
Private Internet Access / Denver / June 2018 – November 2022

- Lead a team of 10 highly technical tier 2 agents in identifying, testing and escalating significant application related issues.
- Lead an analytics team responsible for data to assist with external departments with tracking of OKRs.
- Created a process and gathered data to improve operations and departmental CSAT, resulting in a 3% increase to 93%, exceeding industry standards.
- Worked directly with various teams and departments such as QA, Content Writing, Technical Operations, Development Operations, Website management, Training & Onboarding, Billing departments, and more.

CUSTOM PC BUILDER
Micro Center / Denver / September 2016 – June 2018

- Educated and assisted customers to choose specific components to build their own PC/server.
- Aided customers on troubleshooting problems in a wide range of areas.
- Helped customers improve their computer's performance with upgrades or service.
- Built quotes for customers using different products to fit their budget and needs.
- Stayed up to date on current and upcoming products to further guide and educate customers.
- Assisted and trained new members to the department when necessary.
